

Project Appraisal and Macroeconomic Policy (Paperback)

By T Van Der Burg

Springer, Netherlands, 2012. Paperback. Book Condition: New. 239 x 163 mm. Language: English . Brand New Book ***** Print on Demand *****.Environmental economics addresses the issues that arise on the boundaries between economic systems and natural systems, such as pollution and natural resource depletion and degradation. Like any other branch of applied economics, it has drawn its tools and techniques from the wide range already available in economics generally, selecting, adapting and extending these to meet its own particular requirements in its own particular context. Here, as elsewhere in economics, public policy analysis requires quantitative assessments of the economic impact of different policy choices. Perhaps the most distinctive contribution of environmental economics has been the development of techniques for the economic valuation of environmental goods and services in the absence of markets for such goods and services, or in the presence of markets that are at best imperfect or incomplete. Nevertheless policy analysis still relies on one or another of three broad groups of methods used in economics generally. One is project appraisal, which at the micro level provides an evaluation of the costs and benefits of investment options to inform the choice among them, while at the...
